

NISHIZAWA LIMITED

Established : 1915

GREETING

New Century

In this age of rapid globalization being accelerated by innovational development of information technology, it will be of a special importance for all commercial houses and manufacturers to associate with the international society in search of well-balanced collaboration effective for mutual benefit on a basic concept of "independence and interdependence".

Under such a significant change of the world, it is our conviction that trading firms must play more important roles with full use of their overall know-how acquired in long international activities not only in the field of traditional commodity transactions but also in such new fields as technical collaboration, capital participation, or joint ventures for human welfare and environmental protection which are increasingly demanded in many young nations.

History

Since establishment of the Company in 1915, we, Nishizawa Limited, have consistently strived to enhance our range of handling commodities and sphere of trading activities to match the needs of each era, keeping close communication with clients through our affiliated companies, branch offices or representative offices being networked over the world. Especially in African countries, we have marked a pioneering status among many Japanese trading firms since early 1950's, when Japan could have just resumed foreign transactions after the World War II. As one good example in Nigeria, we have set up a huge blanket factory in 1962, which was the first Japanese foreign investment in West Africa, and an integrated textile factory in 1965, under joint capitals with public organization and private investors. While taking the leadership for smooth operation of these factories, we have trained numbers of local workers and have successfully provided them with our professional skill and modern know-how to run the factories by themselves.

Activities

Through such a worldwide business collaboration or joint ventures to match the local demand, our aggressive activities have been expanded all over the world, and presently we are enjoying high reputations as a specially integrated trading company with rich examples of success in many foreign countries. In addition to supply of machineries, plants, materials and technical guidance, our eyes are always on the future of human welfare by implementation of such national projects as maintenance and improvement of infrastructures of the world, promotion of health and education for women and children, rural electrification, irrigation and agricultural development scheme etc., based on ODA (official development assistance by Japanese Government) fund.

Our View

Our vision is to focus on "well-being humanity" in 21st Century, and, NISHIZAWA will continue our challenges toward the bright future for all human beings, with awareness of mission as a good consultant and advisor for total solution of world demands in harmony with environmental safeguards.

BUSINESS ACTIVITIES

Since establishment of the organization as a specialized textile trading firm in 1915, NISHIZAWA, with its group of companies, consistently strived for expansion of its fields of business activities by increasing handling commodities to fit the worldwide market demands.

Based on rich experiences and know-how accumulated, we have now successfully transformed ourselves as a "global merchandiser" handling varieties of commodities and services as shown below.

It is our conviction that every human being should co-exist and enjoy prosperity jointly, and, in this respect, we are currently reinforcing our activities in such new projects as rehabilitation of infrastructure, promotion of health and education, rural electrification, irrigation and agricultural development etc., in addition to traditional commodity transactions.

NISHIZAWA shall never cease its ambitious challenges toward the flourishing future for all mankind, assuring of our best possible services at all times.

HISTRICAL HIGHLIGHTS

From the very beginning of its establishment as a specialized cotton textile trader, NISHIZAWA has made strenuous efforts to match the demands from global market.

While enjoying a position as forerunner in textile field in our early days, we have constantly spread our handling articles and extent of services to metal products, machineries, vessels and other industrial commodities, investment and technical collaboration or implementation of such national projects as construction of road, bridges, marine facilities or electric power stations etc., for improvement of infrastructures, some of which are highlighted in this chapter for better understanding of our activities.

NISHIZAWA shall, with its wide and innovative eyes, continue to be an all-round business advisor and a good partner for all the concerned.

(The early days)

1915	Mr. Hachisaburo Nishizawa, the founder of NISHIZAWA, establishes NISHIZAWA HACHISABURO SHOTEN as a specialized cotton printed textile trader in Osaka.
1922	Opens representative offices in Shanghai, Dalian, Tiangin and other major cities in China to expand sales of printed fabrics mainly in Chinese market.
